# Colombia Composite Logs Library

The Colombia Composite Logs Library (CL<sup>2</sup>) is a unique tool to screen new acreage, identify missed pay and new conventional and unconventional opportunities in the Colombian Basins.

This wells library comprises 580+ wells from all colombian basins (frontier and mature) and provide a wealth of subsurface information that will help you reduce interpretation uncertainty, improve play and prospect definition and increase your chances of success.

Contact us today for additional information and a 7-day free access trial of this comprehensive well data library at:
